CELLBOARD

CELLBOARD

CellBoard is made out of TPE foaming materials, an innovative macromolecule material which contains ZERO wooden or PVC components that is able to offer an excellent outdoor performance with good physical and chemical stabilities. It is a substitute to natural wood thats been used in indoors decoration and outdoors construction for more than 12 years and it is an optimal alternative to natural timber. CellBoard has excellent weather-resistance property with no coating requirements.

It is water proof, anti-concussion, low density, light weight (with gravity 0.10 g/cm³), it has excellent nail holding strength, and it provides acoustic insulation as well as greater electrical and thermal conductivity. It is also an environmentally friendly Board.

Features

Non-Toxic & 100% Recyclable

Unlike conventional products, CellBoard is 100% recyclable. It also passes the international Blue Angel Certification standards with no harmful emissions.

Ultra Light Yet Strong

Great strength to weight ratio is achieved by the CellBoard foam core that offers great structural strength with low density (0.1 to 0.3 g/cm³).

Flexible & Non-Brittle

Ability to easily process and form with standard tools. furthermore, unlike conventional PVC foamed boards, CellBoard is flexible yet non-brittle.

Natural Colors & Finishes

Natural timber colors and finishes make it the perfect outdoor deck and decktiles.

Additional Features

100% Water Proof
Internal/External Suitable
Anti-Corrosive
Long Life Expectancy
Nail, Bend and Rivet

CELLBOARD DECK

Unlike natural wood which cracks, warps, rots and splits after it is exposed to wind, rain and the sun in outdoor environments and also requires regular maintenance, Cellboard Deck is completely different. It's highly resistant to termite, water, mould, fungal, has high anti-slip rating for use in wet and barefoot areas. It does not need to be coated or recoated which significantly reduces maintenance requirements.

CellBoard Deck looks and feels exactly like the natural wood. It has a beautiful wood grain finish which comes in four colours widely used in landscape. It is suitable for urban terrace, walkway, wharf or any outdoor areas. It is also an environmental friendly Decking Board.
